To whom it may concern,

Over the course of the last 5 years, we have engaged Collinsons Fencing to provide various fencing requirements at our clients' sites. This ranges from 1000mtrs of palisade fencing on an oil terminal in Essex to roof edge protection and free standing guard rail on office buildings in central London. We have always been completely satisfied with the service provided.

From the onset of each project with the provision of quotes, method statements and relevant risk assessments through to the execution and completion of the works, Collinsons have proven to be 100% reliable and efficient, as well competitively priced, friendly and approachable.

I would highly recommend this company.

Glenn Newton  
Company Director.
